

Manual Testing Bug Report –

Application: **Holland & Barrett Website**

Prepared By: **Binit Kumar Singh**

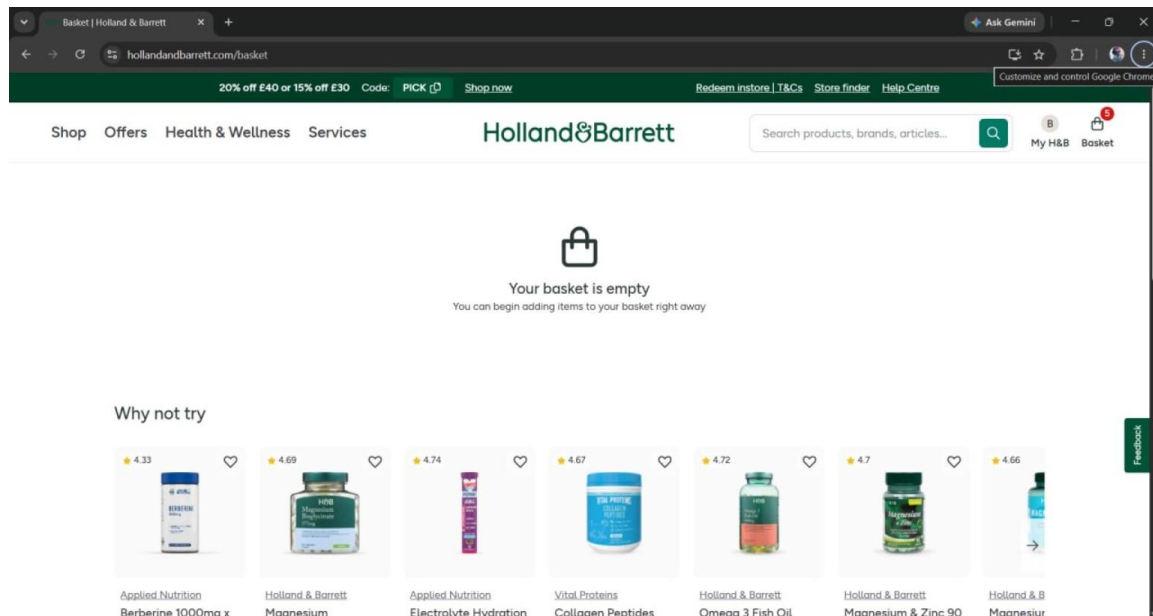

Date: **01/07/2026**

Objective -This document contains the bugs identified during manual testing of the Holland & Barrett website.

The objective is to document functional and usability issues with clear reproduction steps, expected results, actual results, severity and priority.

Bug Report - Holland & Barrett Website

BUG-01: Cart not updating correctly:

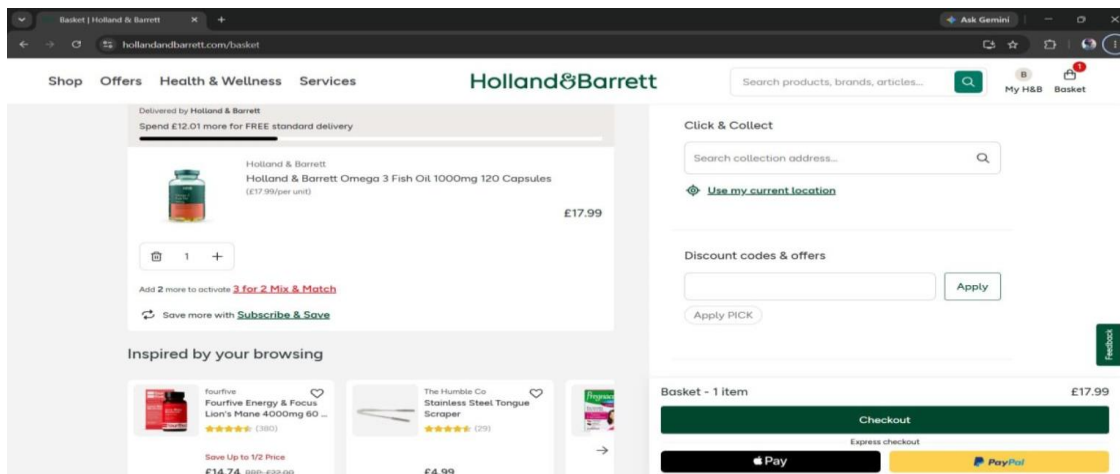

Module: Cart

Issue: Basket count/state is inconsistent after adding items.

Expected: Basket count, items and total update immediately.

Actual: Basket state is inconsistent.

BUG-02: Coupon validation missing

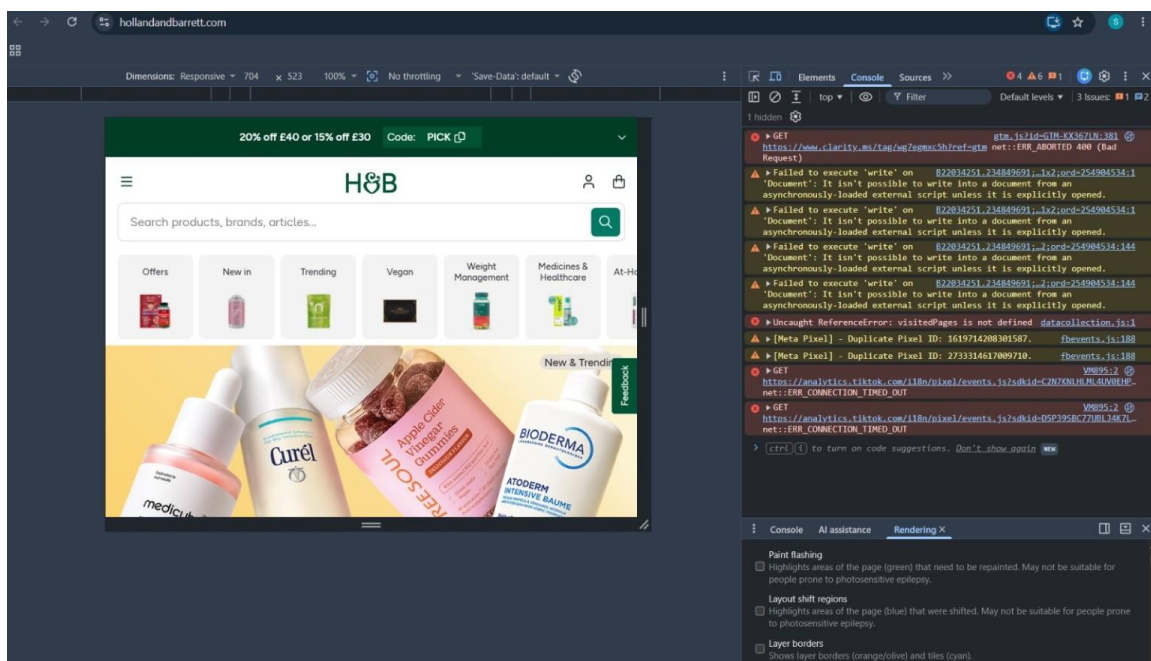

Module: Checkout

Issue: Clicking Apply with an empty coupon field shows no validation.

Expected: Display 'Please enter a coupon code.'

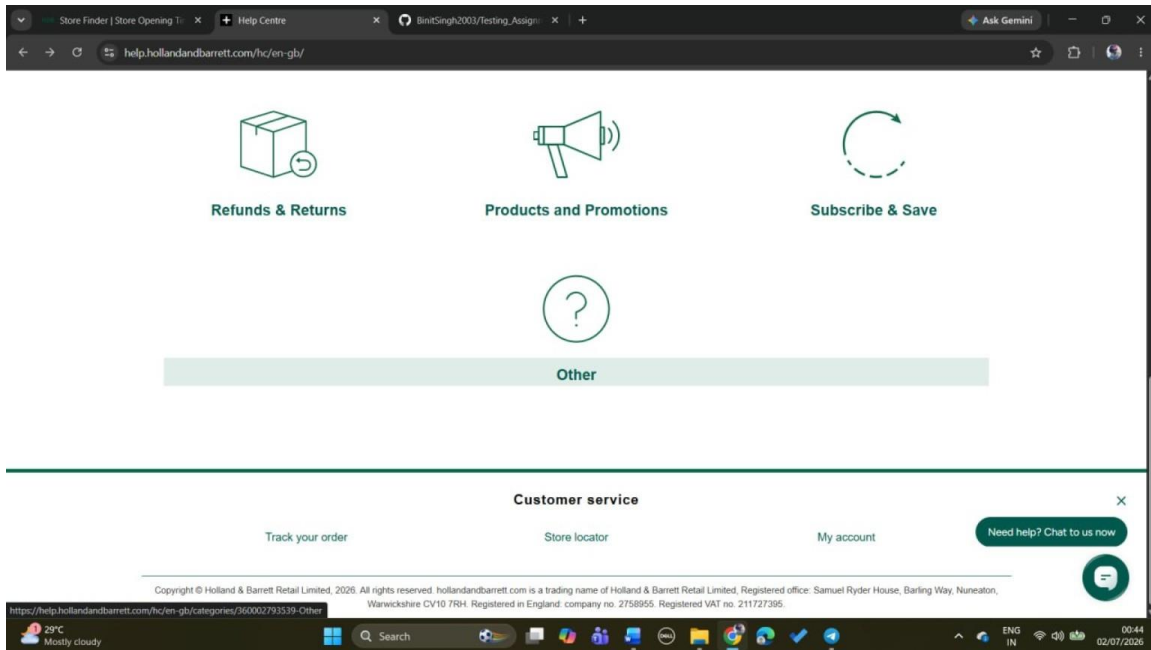

Actual: No validation is shown.

BUG-03: Console Errors

1. Console Message:
Uncaught ReferenceError: visitedPages is not defined. The JavaScript code is trying to access the variable visitedPages before it has been declared or initialized, causing the script to fail.

BUG-04: My Account page not working

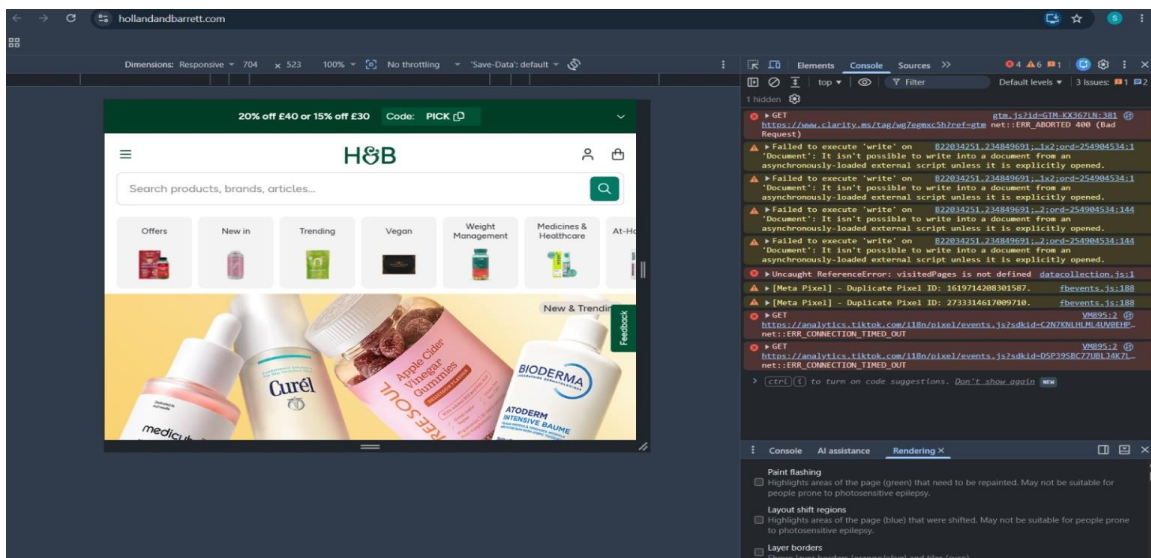

Module: My Account

Issue: Page opens a Page Not Found (404).

Expected: Redirect to My Account/Login page.

Actual: 404/Page Not Found.

BUG-05: Console Error

Console Message:

GET https://analytics.tiktok.com/i18n/pixel/events.js
net::ERR_CONNECTION_TIMED_OUT.

Description: The browser is unable to load the TikTok Analytics script because the network request timed out. As a result, analytics tracking may not work correctly
